Enclosed are copies of the Annual Report for the Rocky Flats Environmental Technology Site Groundwater Plume Treatment Systems, January through December 2003. The tightly focused nature of this report emphasizes the remedial action objectives for each of the groundwater treatment systems rather than technical issues that have developed over the years.

The information contained in this report is intended to show that the groundwater plume treatment reports are operating properly and successfully. Technical issues are addressed in the Groundwater Monitoring Annual Reports and the Groundwater IM/IRA.
